WORK HISTORY

Freelance Web Developer

Contractor

08-2018 - Present

Buckeye, AZ

- Managed all stages of Web site creations for clientele, from initial design and architecture to development, deployment, and management of Web sites
- Developed app integration with REST and Third Party Integrations, social media logins, payment processors to fulfil design and functional needs
- Built various full-stack Single Page Applications (SPAs) and Progressive Web Apps using React, Redux, Javascript (ES6) with several technologies like Node, Express and MongoDB

Full-Stack Web Developer

Rettex.com - Investor Management Software for equity investments

02/2019 - 02/2020

Mountain View, California

- Collaborated closely with product managers, designers, other engineers to plan, scope, build, and **deploy core features in front and backend development** with Node.JS, React.Js and Monogodb
- Spearheaded the standardization front-end and back-end development across an international team, including incorporation of Agile methodology which **decreased code complexity and improved maintainability**
- Developed a system for managing the creation and signing of legal contracts of property equity investments necessary for **financing on the core business products**
- Designed and configured a fully automated continuous integration and continuous deployment lifecycle for the business-critical services resulting in **3x reduction of average** deployment time

SIDE PROJECTS

GroceryGo - React Shopping Platform

[Demo Github](#)

- GroceryGo is a food delivery, grocery and local shopping platform developed with Node, React.Js, Express, and Mongo. Core functionality include full featured shopping cart, authentication, checkout, and admin management

Amazon Clone

[Demo Github](#)

- Clone of Amazon Website (incl. authentication, catalog and shopping cart functionalities). Implemented with React, state management based on React Context API and Firebase integration
